

ARUNDEL

MANDIBLE

The Mandible is our top of the line model. The grip is the strongest of all Arundel cages, with an emphasis on a tight fit to keep the bottles on the bike no matter what. Mandible cages have weathered the Grand Tours, the Spring Classics, Worlds, all of it. Durable and elegant.

WEIGHT: 28 grams

UD GLOSS BLUE UD GLOSS RED

3K GLOSS 3K MATTE UD GLOSS UD MATTE

DAVE-O

The Dave-O cage is perhaps iconic, as before 2001 bottle cages didn't look or work like this. A classic shape, copied often. Due to more surface area and less arm tension, it's easier to remove a bottle from a Dave-O compared to Mandibles. Dave-O's are the benchmark of quality in carbon bottle cages.

WEIGHT: 30 grams

SIDELOADER & OTHER SIDELOADER

SideLoader / Other SideLoader cages solve the problem of cramped space on Compact style road frames, as well as MTB applications. They're dedicated right or left (fitment specific). One Sideloader plus one OtherSideloader outfits a standard road frame. The shape matches Dave-O's perfectly.

WEIGHT: 30 grams

UD MATTE (L) UD MATTE (R) UD GLOSS (L) UD GLOSS (R)

TRIDENT

The unique Trident shape with two wide, flared arms provides a secure fit with little risk of lost bottles. Gripping the bottle to take a drink is really easy, so too is replacing the bottle. The flared part of the arms is the reason for this, yet few manufacturers go to this trouble.

WEIGHT: 30 grams

BANDO

The Bando combines the security and styling of our top of the line Mandible, with the affordability of our entry level cages. The Bando Cage allows the user to adjust the level of bottle cage security. Match the ease of use desired by selecting one of the two different silicone bands included. The cage functions normally with no band. The bottle releases with the gentlest of tugs and flows out of the cage. Of course security is at a minimum, so this setting is only recommended for casual riding. With the Thin Band installed, you can expect the bottle holding security that Arundel is known for. The grip level is just below our top model of cage, the Mandible. For more extreme riding conditions or applications, use the Thick Band. The cage becomes a fortress, unlikely to give up a bottle without a fight. Certainly among the most secure bottle cages ever made.

WEIGHT: 54 grams w/thick band installed

BLACK BLUE GREEN ORANGE

PINK POWDER BLUE RED WHITE

STAINLESS CAGE

Stainless 4.2mm steel tubing bent in the same graceful curves as our original model. The mounting spine is a stamped piece of art. This is not a standard metal cage. The finished cage is polished to a brilliant shine and will add to the aesthetics of any machine.

WEIGHT: 53 grams

STAINLESS

SPORT CAGE

The Sport is basically a modified Dave-O shape, made of Nylon reinforced plastic. Sports are as tough as nails and hold bottles well in all conditions and any application. They have two sets of mounting holes to allow the best fit possible. We consider this cage as good as anything we make, it's just made out of different stuff.

WEIGHT: 47 grams

POWDER BLUE

GREEN ORANGE PINK YELLOW

BLACK BLUE WHITE RED

FLIP FLOP CAGE

The Flip Flop cage is made like our Sport and priced accordingly. It's a flexible design allowing the owner to mount it left or right without losing the security and good fit that you get with proper lower and upper tabs.

WEIGHT: 53 grams

| BLACK |

| WHITE |

LOONEY BIN

The Looney Bin is designed for the casual rider or enthusiast who might not always have a standard sized bicycle water bottle. It will hold a skinny bottle of beer all the way up to a 32 ounce Gatorade bottle and everything in between. The ratchet closure can adjust to whatever bottle is placed in the cage and can be tightened for a secure grip. The cage uses the same dual mounting holes as most of our other cages. Comes in black or white.

WEIGHT: 55 grams

WHITE

CHRONO I

The Chrono is a remake of aero bottles and cages popularized during the '80's. We copied the old designs and lately, everyone now copies us! The logo is raised to provide a secure grip, even if it's wet or gritty. Two different sets of mounting holes perfect the fit. Spare 20 oz. bottles are available separately.

**No longer UCI legal, check with your sport governing body to insure you can use this.*

WEIGHT: 120 grams
(Bottle 90 grams; Cage 30 grams)

CHRONO II

The Chrono II is a new updated and legal bottle and cage designed to meet the latest international rule requirement while still offering an aero improvement over conventional bottles. The cage has also been redesigned with a premium placed on securing the bottle with longer arms and more of a wrap. Bottle and cage weigh 136 grams.

WEIGHT: 136 grams
(Bottle 100 grams; Cage 36 grams)

ARUNDEL AR75

The 21oz. Arundel AR75 bottle is made of safe, proven LDPE #4 plastic. LDPE is flexible and a durable material that's been used in top quality cycling bottles for years — and contains no harmful BPA. The neck of the bottle is sized for a comfortable grip. Our dimensions improve the bottle fit to most cages available.

The **RACE CAP** has a simple, clever, comfortable mouthpiece that's easy to clean and easy on your teeth.

Ask about our custom printed bottle program!

WEIGHT: 76 grams (including cap)

TRI CLAMP

The key to the Arundel Tri Clamp is the use of a "V-block" design with convex inside surfaces. This helps it fit a variety of round or aero shaped seat posts. The Tri Clamp stays securely fastened and the bottles are easy to reach. Plus, it's affordable.

WEIGHT: 105 grams (not including cages)

HARDWARE INCLUDED FOR A ROUND OR AERO POST

SYNTH. GECKO BAR TAPE

The Synth. Gecko is a thick, durable, shock absorbing bar tape made with 100% silicone foam. Silicone foam has many inherent properties that make bar tape a perfect application. Since it sticks to itself nicely, no additional adhesive is required on the underside of the tape to prevent it from slipping once wrapped. It's easy to wrap, unwrap and even reuse (and you won't be plagued with the inevitable stickum residue that many tapes leave behind). Synth. Gecko cleans up easily with soap and warm water, and the result will leave it looking nearly brand new.

The subtle pavé pattern of the tape provides a surface texture to improve tactile feel and grip. The additional grip is beneficial, particularly on blistering hot days when palms get sweaty, or during the occasional downpour. The natural texture of silicone foam is comparable to brake hoods; it is tacky, squishy but firm, while providing excellent vibration dampening.

Synth. Gecko comes in a pack of two, 220 cm rolls. Want extra cushion? Wrap it thick and fat. Care for a grippy, low volume wrap? Stretch it and wrap it thin. The choice is yours!

WEIGHT: 197 grams

THE SYNTH. GECKO BAR TAPE
IS AVAILABLE IN:
BLACK, WHITE, RED, BLUE, YELLOW,
GREY, PINK, GREEN, ORANGE

RUBBER GECKO BAR TAPE

Rubber Gecko is a cushy bar tape made with foam and an outer layer of natural rubber. Rubber Gecko offers a soft tactile grip with a bit of give to it. It wraps slightly fatter than our original gecko grip, but not by much. Perfect for the rainy, cold cobbled classics.

WEIGHT: 86 grams

THE RUBBER GECKO BAR TAPE
IS AVAILABLE IN:
BLACK, WHITE

GECKO BAR TAPE

GECKO GRIP (LEFT)

Gecko Grip is EVA foam and ventilated polyurethane in a laminated, layered construction. Gecko Grip has a rubbery, "grippy" feel compared to cork tape. It lays flat on the wrapped bars and is thinner than cork. It doesn't absorb sweat as easily as Cork and can be wiped off with a wet rag in seconds.

WEIGHT: 63 grams

GECKO FUR (INSET)

Gecko Fur comes only in black, has a furry velvet hand and remains Dave-O's personal favorite. Fur lays flat, not thick or puffy and doesn't absorb much, or become slick. The embossed Arundel logos set off the matte-like finish with just a touch of sheen.

WEIGHT: 74 grams

THE GECKO GRIP BAR TAPE
ARE AVAILABLE IN:
WHITE, GREY, BLACK, BROWN,
YELLOW, BLUE & RED

CORK BAR TAPE

CORK

Cork wrap is really a lot of foam with cork chunks mixed in. It's thick and softens road vibration. It can soak up moisture yet remains easy to grip. It's durable and easy to install. It holds color well and doesn't fade. You can wash it like you wash the car; soapy rag, scrub, rinse, repeat.

WEIGHT: 49 grams

THE CORK BAR TAPE IS AVAILABLE IN:
WHITE, GREY, BLACK, NATURAL, YELLOW, BLUE & RED

BAR TAPE CLIPS

Bar Tape Clips are simple little plastic replacements for electrical tape that is often used to finish off wrapped bars. They work with one or two internal cables, on oversized 31.8 bars or old school 26.0 bars. In either case, our clips grip the tape where the bar tapers to 25.4. (This means on 31.8 bars the clips will be spaced a bit wider.)

SHAMELESS PLUGS

Shameless Plugs are a two-piece multi tool that are stored in your bar ends. Save space in your seat bag and always have tools at hand for those unforeseeable adjustments or repairs while on the road. They consist of a Driver and a Tool bit holder, which are grafted onto a pair of bar end plugs. The bar end plug tools are accessible by hand (no tools required) with a simple twist of the knurled knob. The kit comes with a set of 11 bits allowing you to choose the ones you need. The Driver portion has an integrated JIS screwdriver for simple or emergency derailleur adjustments, and a magnetic receptacle to hold the bit in place while in use.

11 BITS INCLUDED

Hex: 2, 5, 3, 4, 5, 6

Torx: T10, T15, T20, T25, T27, T30

Quiver holds 3 bits

SEAT BAGS

DUAL (RIGHT)

The Dual is so named because you can fit two 700c tubes, two gas cartridges and a gas valve, plus have room left over. Alternately, it will fit an ATB tube and gas, no problem. The leather patch prevents the seat post clamp from wearing a hole in the tubes inside. The simple Velcro strap is sewn double thick to hold its shape and to keep the bag cinched tight. **27 cubic in.**

TUBI (INSET)

Tubis are very similar in construction to the Dual but longer and skinnier. It will hold a tubular tire or regular tubes, plus extra supplies. **35 cubic in.**

UNO (INSET)

Unos are small, only big enough to carry the basics for a flat change. The Uno has a very small footprint under the saddle and weighs almost nothing. **16 cubic in.**

THE DUAL, TUBI & UNO SEAT
BAGS ARE AVAILABLE WITH:
WHITE, GREY, RED, YELLOW,
BLACK, BLUE & PINK
PIPING

FLOOR PUMP 1

Our goal in entering the pump market was to make one that's not worn out after a couple years of use. An important measure we took to achieve that goal was to use more metal parts rather than good old cheap? plastic. I considered the word 'cheap' but then thought "What if we gain traction and in three years decide to offer a low cost pump? It will use more plastic..." Good pumps are tools to do a job, but to some cyclists, they mean more. To our knowledge, this is the only floor pump on the market with a forged and anodized aluminum base. We went to this trouble because forged aluminum is incredibly durable, more so than die cast aluminum, let alone plastic. What good is a pump if you can't accurately and easily read your tire pressure? That is why we upgraded to a big 3" clutter-free gauge.

Notice the polished aluminum tube? It's Mandrel Drawn to insure tight tolerances, sealing the plunger more consistently throughout each stroke. We spec'd stainless steel internal check valve parts to prevent rust. The unique, Arundel designed Hansel Presta pump head is easy to use with a secure thumb lock lever and is included. We opted for a tried and true wooden handle because they are comfortable to the touch, even in hot or cold weather. Our pumps are fully serviceable. Replacement parts are available for sale to ensure your pump will always operate like it should.

PUMP HEAD FAMILY

For the bicycle and tool connoisseurs out there, this kit includes all three Arundel pump heads in a dedicated box, plus a barbed Schrader hose end fitting (to convert your current pump hose) if needed.

HANSEL

Our popular metal thumb-lock style is simple and quick to use. The grommet is replaceable. All of our pump heads thread onto a Schrader hose end.

GRETTEL

This one threads onto the Presta tube valve for easy, secure one-handed operation. Really handy in tight spots where space is limited.

THE WOODSMAN

This guy is our take on the timeless push-on style, also with a replaceable grommet. Presta pump heads have been made this way for many decades because they work simply and effectively in many conditions.

BELLS

It's not easy to gain the attention of other cyclists, runners and walkers without making noise and bells beat yelling. There is actually an art to making a nice sound come out of something so small. Stainless steel thumbscrew so you can install or remove the bell with no tools; fits 31.8 with a shim to fit 28.6.

JEZEBELL

Same size as Maybell, but heavier (darn brass) – 71 grams. Really BIG sound due to the brass dome, adjustable ringer.

MAYBELL

Larger, louder – 46 grams, black anodized aluminum, adjustable ringer.

ISABELL

Our smallest, most compact bell – 54 grams, very compact, polished brass, fixed ringer.

SHOP APRON

If you had to, you could work on your bike wearing a garbage bag to protect your duds. We recommend you spend more. In return you'll get more. Our shop aprons are made by our friends at American Native Goods, in a smallish town in northwestern Arkansas, a beautiful place in the Ozarks. They are two brothers with educational backgrounds in design, yet who grew up on a dairy farm. As a result, they value well-made stuff like we do. We're proud they were willing to make this apron to a spec we all agreed upon.

The fabric is 12oz. (per square yard) cotton canvas, milled in the U.S. by a South Carolina based textile mill. The leather is called "veg tan" and the reason this is worth mentioning is that leather comes in many flavors. Some are cheapo and some are more expensive but more durable. Ours is the latter. The rivets are copper, reinforced with bits of leather. The thread used is bonded polyester but Nylon is used on the leather pocket, both to avoid rotting.

These are stiff when new but give it time to break in, like a favored pair of blue jeans. The neck strap and waist belt will also take a set to your shape, soon fitting like it was meant for you. A good shop apron is one of life's affordable pleasures. Not likely to give you a rash, cause a divorce or prevent you from winning Flanders. Not that it will help you either.

One size fits all, any color you want as long as its forest green with a brown leather pocket and straps.
